GROWERS LIST 1919

The chief end to be sought after by all responsible seedmen, is purity of stock; to be certain to attain that end place your growing order with a careful grower, of experience. Pure Watermelon seed are only to be had by great care, patience and expence, each variety must be completely isolated from all others, not only while growing but during harvesting. To do this requires a large acreage of land and experienced labor, with many years experience in the business. We offer with confidence to compete in prices with any grower who sells pure seed, true to name. By long experience and thorough training of our labor we have reduced the expence of growing melon seed to Minimum, but we have not yet reduced it so low that we can compete in prices with the melon grower who ships his good melons to market and saves seed from the refuse left after shipping. Should you wish any other varieties grown not in our list we can arrange to grow them for you. Terms: acceptance due in 60 days after shipment or less 2% 20 days from date of Invoice. All contract orders filled in September. One hundred dollars reward with proof that we ship or sell melons from our seed farms.

We name among our customers nearly all of the best Seedmen in the United States, and can give the best of reference, where such are required. Your order will be appreciated and properly cared for, Try us.

VARIETIES WE WILL GROW.
